## 1 Executive Summary

Al-Qawsan Scientific Bureau was established in Baghdad in 2009 and has grown into one of the leading private-sector pharmaceutical distributors in Iraq, serving healthcare professionals, pharmacies and the public sector through partnerships with international manufacturers. The new website must present that position with the same clarity and credibility as the best sites in the Iraqi scientific bureau market.

This proposal defines the **structure** of the new website: the header and its navigation tabs, every page and sub-page, how pages **connect** to each other, and the **workflow** that turns content into published pages. It follows the proven pattern of **alsumo.com.iq** (Al Sumo Scientific Bureau): a clear corporate header, headline numbers, a full-lifecycle services story, partners grouped by region and a strong contact / partnership call to action.

### Objectives of the new website

- **Win partners:** convince international manufacturers that Al-Qawsan is the right distribution and market-access partner in Iraq.
- **Inform healthcare professionals:** easy access to the product portfolio by therapeutic area.
- **Serve the public sector:** a clear path for hospitals and tender officers.
- **Recruit talent:** a careers section with online applications.
- **Be bilingual-ready:** English and Arabic (right-to-left) from day one, with a language switch in the header.
- **Be easy to maintain:** a CMS and a defined content workflow so the site stays current.

### What this proposal covers

| # | Deliverable                                                    | Where            |
|---|----------------------------------------------------------------|------------------|
| 1 | Reference analysis of alsumo.com.iq                            | Section 2        |
| 2 | Header design: utility bar, logo, tabs, dropdowns, CTA, mobile | Section 3        |
| 3 | Navigation tabs and dropdown menu items                        | Section 4        |
| 4 | Full sitemap (page tree)                                       | Section 5        |
| 5 | Homepage section order and page-by-page content                | Sections 6 - 7   |
| 6 | How the pages connect: user journeys and linking rules         | Section 8        |
| 7 | Footer structure                                               | Section 9        |
| 8 | Content workflow, roles (RACI) and update schedule             | Section 10       |
| 9 | Technical recommendations, timeline and next steps             | Sections 11 - 13 |

## 2 Reference Model: alsumo.com.iq

Al Sumo Scientific Bureau (founded 1997, Baghdad) runs one of the most complete websites among Iraqi scientific bureaus. The table below lists the patterns that make it effective and how each one is adapted for Al-Qawsan. We copy the **structure**, not the content: all Al-Qawsan text, figures and images will be original.

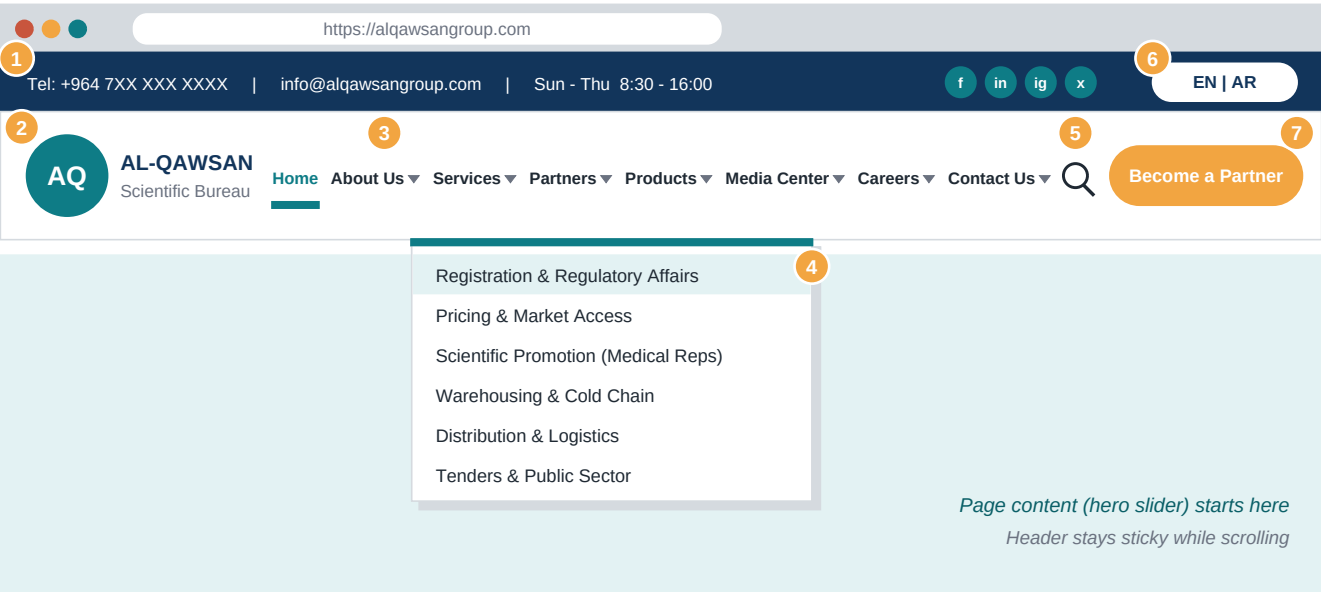

| Pattern on alsumo.com.iq                                                 | Why it works                                           | Adoption for Al-Qawsan                                                                                        |
|--------------------------------------------------------------------------|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| Bilingual site (English / Arabic) with a language switch                 | Serves both international partners and local customers | EN / AR switch in the utility bar; full RTL layout for Arabic                                                 |
| Headline numbers (e.g. 5,600+ customers, 18 governorates, 400+ products) | Instant proof of scale and reach                       | 'Key numbers' counter strip on the homepage (years since 2009, partners, products, customers, coverage) [TBC] |

| Pattern on alsumo.com.iq                                                                                                         | Why it works                                 | Adoption for Al-Qawsan                                                       |
|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|------------------------------------------------------------------------------|
| Services told as the full market-entry lifecycle: registration, pricing, scientific promotion, warehousing, cold chain, delivery | Speaks directly to what a manufacturer needs | Services tab with one sub-page per lifecycle stage + Tenders & Public Sector |
| Partners page grouped by region (Europe, Middle East)                                                                            | Shows international credibility at a glance  | Partners tab: logos grouped by region, each with a partner detail page       |
| About page built on experience ('25+ years')                                                                                     | Trust through history                        | About Us: history timeline from 2009, vision / mission, leadership, quality  |
| Group / sister companies (Amman, London, Erbil)                                                                                  | Shows regional reach                         | Optional 'Group Companies' page under About Us, if applicable                |
| Contact page with HQ address, map and working hours                                                                              | Easy to reach, looks established             | Contact Us: HQ + map, branches / coverage, inquiry form, working hours       |

Reference points are based on publicly available information about alsumo.com.iq and alqawsangroup.com. They will be validated with the Al-Qawsan team during the Discovery phase.

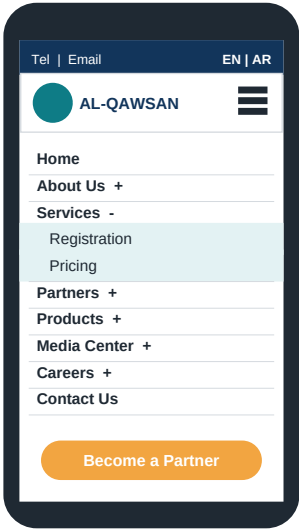

### 3 Header Design

The header appears on every page and is the main way visitors move around the site. It has two rows, a slim **utility bar** and a **main navigation bar**, and stays fixed (sticky) at the top while the visitor scrolls. The numbered markers are explained in the table below the wireframe.

| # | Element         | Specification                                                                                                                  |
|---|-----------------|--------------------------------------------------------------------------------------------------------------------------------|
| 1 | Utility bar     | Navy strip: phone, e-mail, working hours (left); social icons and language switch (right). Hidden on scroll to save space.     |
| 2 | Logo            | Al-Qawsan logo, links to Home. Left in English, right in Arabic (RTL).                                                         |
| 3 | Main tabs       | 8 tabs: Home, About Us, Services, Partners, Products, Media Center, Careers, Contact Us. The active tab is underlined in teal. |
| 4 | Dropdown menu   | Opens on hover (desktop) or tap (mobile) and lists the sub-pages of the tab (see Section 4).                                   |
| 5 | Search          | Site-wide search for products, news and pages.                                                                                 |
| 6 | Language switch | EN   AR. Keeps the visitor on the same page in the other language.                                                             |
| 7 | Call to action  | 'Become a Partner' button (orange) opens the partner form. It is the main business goal of the site.                           |

Mobile header

On phones the tabs collapse into a **hamburger menu**:

- Utility bar reduced to phone, e-mail and EN | AR.
- Logo left, hamburger icon right.
- Menu opens as a full-height drawer; tabs with sub-pages expand like an accordion (+ / -).
- 'Become a Partner' stays visible at the bottom of the drawer.
- Tap targets of at least 44 px; the menu closes on selection.

4 Navigation Tabs & Dropdown Menus

The main navigation has **8 tabs**, the same depth as the reference site. Each dropdown has no more than six items so the menu stays easy to scan. Only Home is a single page without a dropdown.

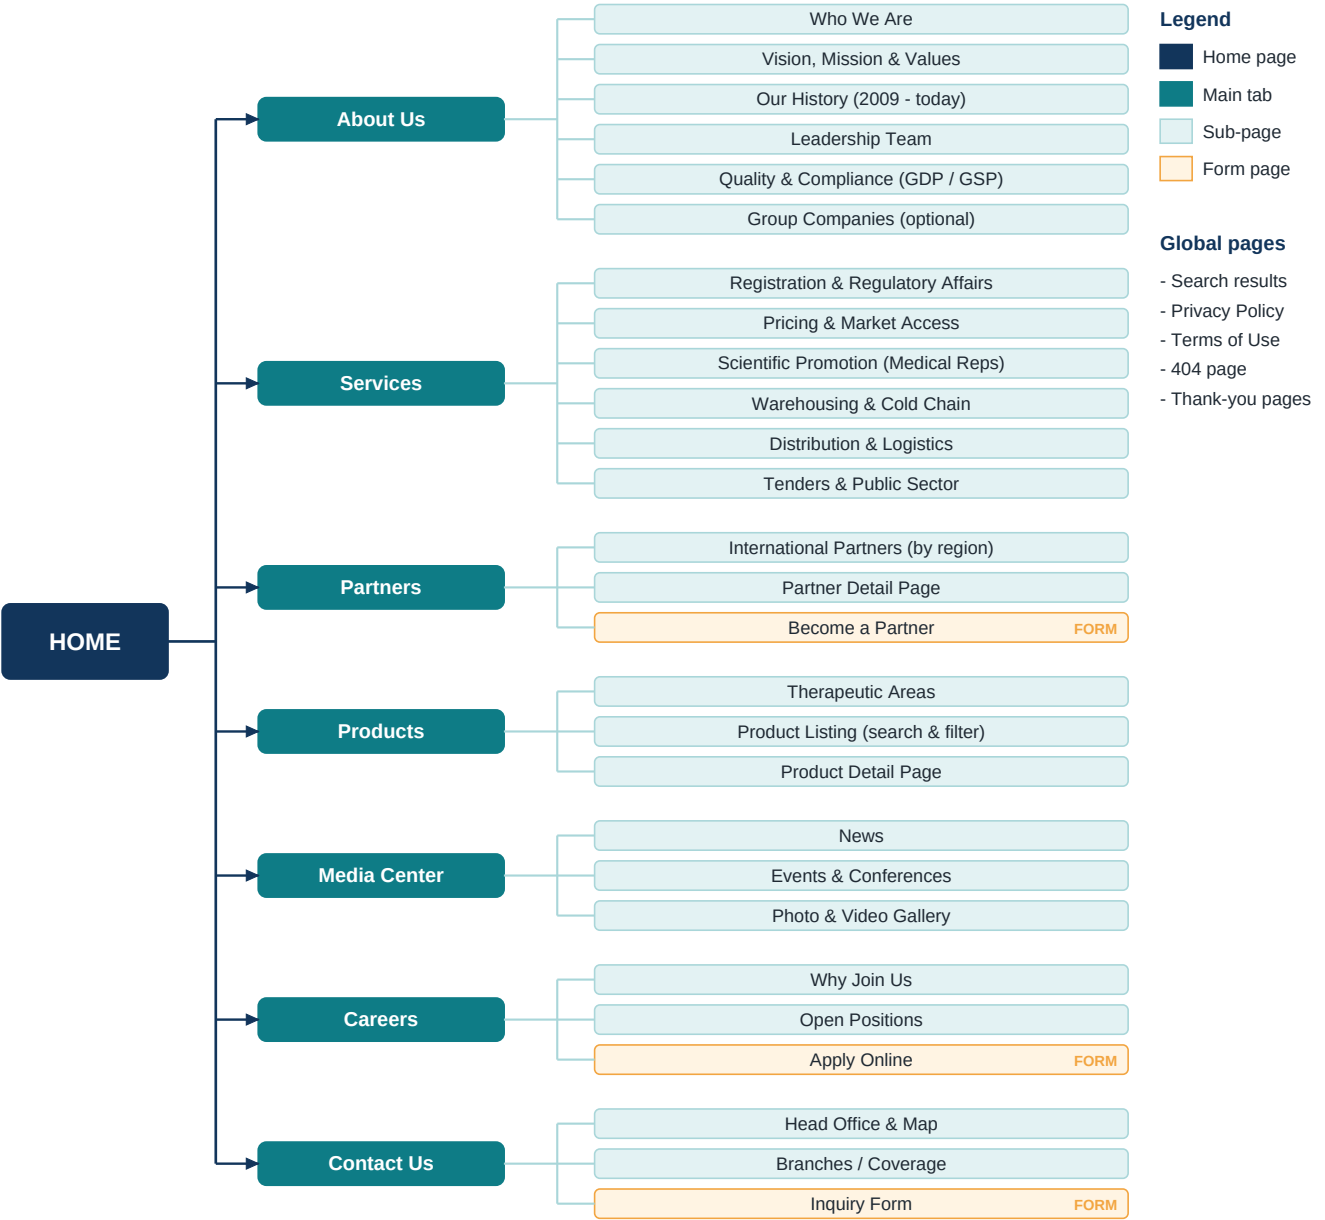

| Tab          | Dropdown items (sub-pages)                                                                                                                                                                         | Purpose / audience                                                                       |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| Home         | No dropdown (single page)                                                                                                                                                                          | Overview of the company; entry point for all audiences.                                  |
| About Us     | - Who We Are<br>- Vision, Mission & Values<br>- Our History (2009 - today)<br>- Leadership Team<br>- Quality & Compliance (GDP / GSP)<br>- Group Companies (optional)                              | Build trust: who Al-Qawsan is, its history since 2009, leadership and quality standards. |
| Services     | - Registration & Regulatory Affairs<br>- Pricing & Market Access<br>- Scientific Promotion (Medical Reps)<br>- Warehousing & Cold Chain<br>- Distribution & Logistics<br>- Tenders & Public Sector | Main sales story for manufacturers: the full market-entry lifecycle in Iraq.             |
| Partners     | - International Partners (by region)<br>- Partner Detail Page<br>- Become a Partner (form)                                                                                                         | Show international partners and collect new partnership requests.                        |
| Products     | - Therapeutic Areas<br>- Product Listing (search & filter)<br>- Product Detail Page                                                                                                                | Portfolio for doctors, pharmacists and buyers, organised by therapeutic area.            |
| Media Center | - News<br>- Events & Conferences<br>- Photo & Video Gallery                                                                                                                                        | News, events and gallery. Keeps the site active and improves SEO.                        |
| Careers      | - Why Join Us<br>- Open Positions<br>- Apply Online (form)                                                                                                                                         | Employer brand and online recruitment.                                                   |
| Contact Us   | - Head Office & Map<br>- Branches / Coverage<br>- Inquiry Form (form)                                                                                                                              | All ways to reach the company, plus an inquiry form.                                     |

**Header order rule:** tabs are ordered by importance to the business goal: credibility (About), offer (Services), proof (Partners, Products), activity (Media), people (Careers), action (Contact). The 'Become a Partner' button comes last.

5

Sitemap (Page Tree)

The full site has **1 home page**, **7 main sections** and **27 sub-pages**, plus global utility pages. Every page is at most **two clicks** from Home.

## 6 Homepage Structure

The homepage follows the reference site's pattern: first prove scale, then explain the offer, then show proof, then ask for action. Sections from top to bottom:

## Homepage content fields

| # | Section     | Content fields                                                                     | Links to                  |
|---|-------------|------------------------------------------------------------------------------------|---------------------------|
| 1 | Header      | See Section 3                                                                      | All main pages            |
| 2 | Hero slider | Per slide: background image, headline (max 8 words), sub-line, button label + link | Services, Partners, Media |
| 3 | Key numbers | 5 counters: value + label (e.g. 17+ Years, XX Partners) [TBC]                      | About Us                  |

| #  | Section           | Content fields                                     | Links to                       |
|----|-------------------|----------------------------------------------------|--------------------------------|
| 4  | About teaser      | Photo, 60-word intro, 'Read more' button           | Who We Are                     |
| 5  | Services grid     | 6 cards: icon, title, one-line description         | Each service page              |
| 6  | Partners carousel | Partner logos (SVG/PNG), alt text, link            | Partner detail pages           |
| 7  | Therapeutic areas | Area name, icon, short text                        | Filtered product listing       |
| 8  | Coverage map      | Governorates served, branches, warehouse locations | Branches / Coverage            |
| 9  | Latest news       | Pulled automatically: 3 newest articles            | News articles                  |
| 10 | CTA band          | Headline + 2 buttons                               | Become a Partner, Contact Us   |
| 11 | Footer            | See Section 9                                      | Quick links, services, contact |

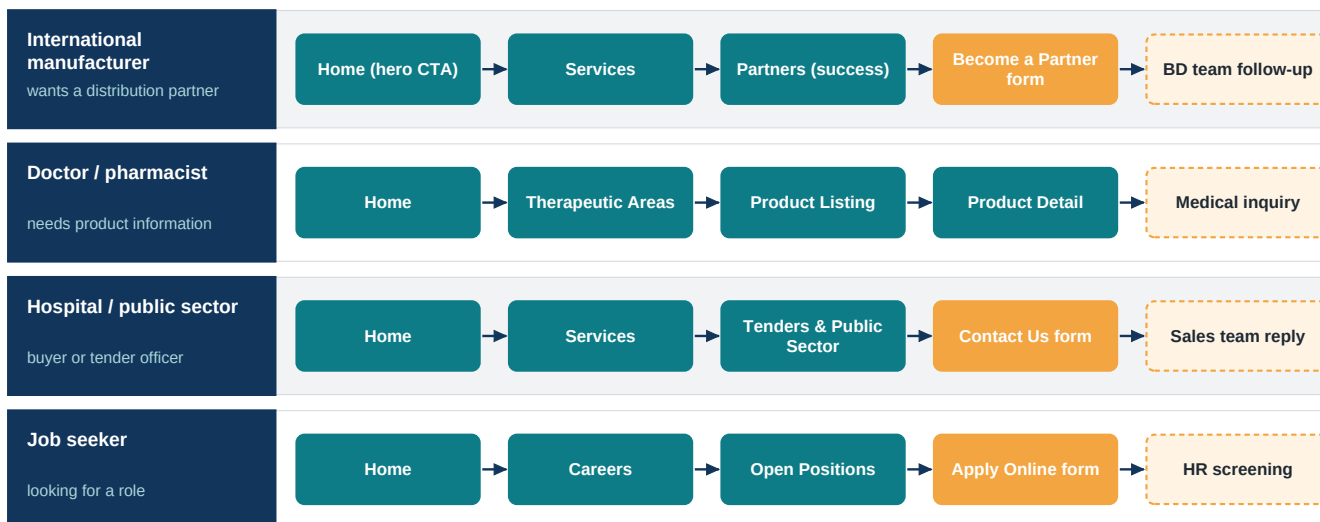

## 7 Page-by-Page Content Specification

Each inner page uses the same template: **page banner** (title + breadcrumb) > **content sections** > **related links** > **CTA band** > footer. The table lists what each page needs.

| Page                         | Key sections                                               | Content required                                           | Assets                  |
|------------------------------|------------------------------------------------------------|------------------------------------------------------------|-------------------------|
| Who We Are                   | Intro, what we do, key numbers, why Al-Qawsan              | 300 - 500 words EN + AR, figures [TBC]                     | Team / office photos    |
| Vision, Mission & Values     | Vision, mission, 4 - 6 values                              | Approved statements                                        | Value icons             |
| Our History                  | Timeline 2009 to today                                     | Milestones by year                                         | Historic photos         |
| Leadership Team              | Profile cards                                              | Name, title, short bio                                     | Professional portraits  |
| Quality & Compliance         | GDP / GSP, pharmacovigilance, certificates                 | Policy summaries                                           | Certificate scans (PDF) |
| Services (x6)                | Overview, how it works (steps), benefits, related partners | 150 - 300 words per service                                | Service photo, icon     |
| Partners                     | Logos grouped by region, filter                            | Partner name, country, since                               | High-resolution logos   |
| Partner Detail               | About the partner, products distributed                    | Short profile + product links                              | Logo, photo             |
| Become a Partner             | Benefits, form                                             | Form fields: company, country, portfolio, contact, message | -                       |
| Therapeutic Areas / Products | Area tiles, search & filter, product cards                 | Product name, generic name, form, strength, partner, area  | Pack shots              |
| Product Detail               | Summary, indications (as registered), partner, related     | Only MoH-approved information                              | Pack shot, leaflet PDF  |
| News / Events / Gallery      | List + article pages, categories                           | Title, date, text, tags                                    | Photos, videos          |
| Careers                      | Why join, open positions, apply                            | Job title, location, requirements, deadline                | Team photos             |
| Contact Us                   | HQ details, map, branches, inquiry form                    | Address, phones, e-mails, hours                            | Map embed               |

## 8 How the Pages Connect

Pages are connected in three ways: (1) the **header and footer** on every page, (2) **contextual links** inside the content, and (3) **calls to action** that lead each visitor type to a form. The diagram shows the main user journeys. Each one ends in a conversion (orange = form).

### Linking rules

| From                      | Always links to                                                             | Why                                 |
|---------------------------|-----------------------------------------------------------------------------|-------------------------------------|
| Header (every page)       | 8 main tabs, dropdown sub-pages, search, EN   AR, Become a Partner          | Global navigation                   |
| Footer (every page)       | Quick links, all 6 services, contact details, privacy / terms               | Second navigation, SEO              |
| Page banner (inner pages) | Breadcrumb: Home > Section > Page                                           | Visitor always knows where they are |
| Service page              | Related partners, related therapeutic areas, Become a Partner CTA           | Turns interest into a lead          |
| Partner detail            | Products from that partner, Become a Partner                                | Proof, then action                  |
| Product detail            | Therapeutic area, partner page, related products, Contact (medical inquiry) | Keeps visitors exploring            |
| News article              | Related news, share buttons, Media Center                                   | Engagement                          |
| Any form                  | Thank-you page and e-mail to the responsible team                           | Every lead has an owner             |

### Form routing

| Form                      | Sent to                  | Response time                             |
|---------------------------|--------------------------|-------------------------------------------|
| Become a Partner          | Business Development     | Within 2 working days                     |

## 10 Content Workflow

Every piece of content (a new page, product, news article or job) follows the same seven-step workflow. Because Al-Qawsan works in a regulated industry, **medical and regulatory review is mandatory** before anything is published. Orange steps are approval gates. Red dashed arrows show where content goes back for changes.

### Workflow steps

| Step | Activity                                                                     | Owner                | Output         |
|------|------------------------------------------------------------------------------|----------------------|----------------|
| 1    | Content request & brief: topic, audience, page, deadline                     | Marketing            | Content brief  |
| 2    | Draft text in English and Arabic; collect photos, logos, PDFs                | Content Writer       | Draft + assets |
| 3    | Check medical claims, product data vs. MoH registration, compliance          | Medical / Regulatory | Approved text  |
| 4    | Build the page in the CMS on the staging site; set SEO title, meta, alt text | Web Admin            | Staging page   |
| 5    | Final review of the staging page                                             | Management           | Go / no-go     |
| 6    | Publish live, check links, mobile view and both languages                    | Web Admin            | Live page      |
| 7    | Share on social media; monitor visits and form leads monthly                 | Marketing            | Monthly report |

## Roles & responsibilities (RACI)

R = Responsible, A = Accountable, C = Consulted, I = Informed

| Activity                      | Marketing | Writer | Medical / Reg. | Web Admin | Mgmt |
|-------------------------------|-----------|--------|----------------|-----------|------|
| Content plan & briefs         | A / R     | C      | C              | I         | I    |
| Writing & translation         | A         | R      | C              | I         | -    |
| Medical / regulatory approval | I         | C      | A / R          | -         | I    |
| CMS build & SEO               | C         | C      | -              | A / R     | -    |
| Final sign-off                | R         | -      | C              | I         | A    |
| Publishing & maintenance      | C         | -      | -              | A / R     | I    |
| Analytics & reporting         | A / R     | -      | -              | C         | I    |

## Update schedule

| Content            | Owner                            | Frequency                               |
|--------------------|----------------------------------|-----------------------------------------|
| News & events      | Marketing                        | Weekly (at least 2 posts per month)     |
| Products           | Medical / Regulatory + Web Admin | Monthly, or when a registration changes |
| Partners           | Business Development             | When a partnership is signed or ends    |
| Careers            | Human Resources                  | When a position opens or closes         |
| Key numbers        | Management                       | Every 6 months                          |
| Full content audit | Marketing                        | Once a year                             |

## Publishing rules

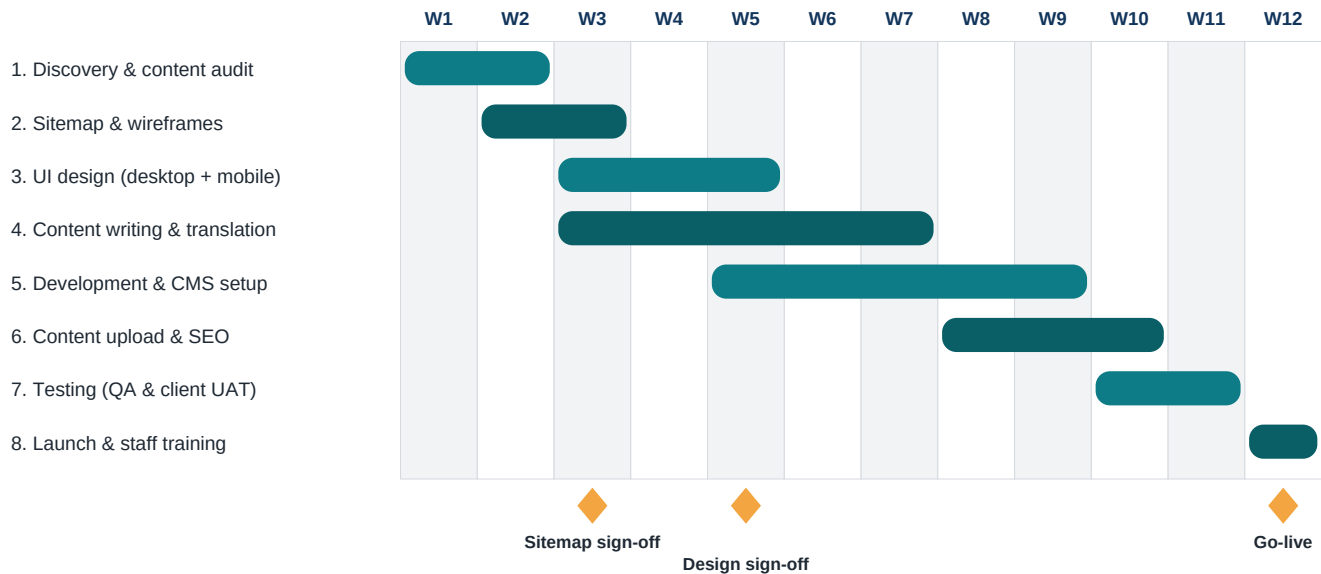

- No medical claim or product text goes live without Medical / Regulatory approval.
- Product information must match the Iraqi Ministry of Health registration.
- English and Arabic versions are published together.
- Images must be owned by the company or properly licensed. Partner logos need partner approval.
- Every change is logged in the CMS revision history.

## 11 Technical Recommendations

| Area          | Recommendation                                                                                                                                                              |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CMS           | WordPress with a multilingual plugin (WPML or Polylang) or a headless CMS. It must support Arabic RTL and user roles that match the workflow (writer, reviewer, publisher). |
| Design        | Responsive (mobile first), corporate colours from the Al-Qawsan logo, one font family with Arabic support (e.g. Cairo, Tajawal or IBM Plex Sans Arabic).                    |
| Performance   | Compressed WebP images, caching and a CDN. Target load time under 3 seconds on mobile.                                                                                      |
| SEO           | Clean URLs (/en/services/cold-chain), meta titles and descriptions, XML sitemap, hreflang tags for EN / AR, Google Search Console.                                          |
| Forms & leads | Forms e-mail the responsible team (Section 8) and are stored in the CMS or a CRM; spam protection (reCAPTCHA).                                                              |
| Security      | SSL (https), regular updates, daily backups, limited admin access.                                                                                                          |
| Analytics     | Google Analytics 4 with conversion goals for every form.                                                                                                                    |
| Accessibility | Good colour contrast, alt text on images, keyboard-friendly menus.                                                                                                          |

## 12 Project Timeline

An estimated **12-week** plan from kick-off to launch. Orange diamonds are client sign-off milestones.

## 13 Next Steps & Inputs Needed from Al-Qawsan

| # | Input                  | Details                                                                          |
|---|------------------------|----------------------------------------------------------------------------------|
| 1 | Approve this structure | Confirm the tabs, dropdowns and sitemap (or request changes)                     |
| 2 | Brand assets           | Logo files (vector), brand colours, any brand guidelines                         |
| 3 | Key numbers            | Partners, products, customers, governorates covered, employees                   |
| 4 | Partner list           | Names, countries, logos and permission to display them                           |
| 5 | Product portfolio      | Product list by therapeutic area (Excel), pack shots                             |
| 6 | Company content        | History milestones, vision / mission, leadership bios, certificates              |
| 7 | Photography            | Office, warehouse, cold chain, team and event photos                             |
| 8 | Contacts & routing     | Official phones, e-mails, address, form recipients                               |
| 9 | Workflow owners        | Names of the Marketing, Medical / Regulatory, Web Admin and Management approvers |

Once the structure is approved, the next deliverable is the set of **desktop and mobile wireframes** for the Home page and one example page from each section, followed by the visual design.
